1) Screenshot of IBM Cognos Analytics on Cloud Trail

Figure 1: Launch IBM Cognos Analytics on Cloud

After successfully signing up I launched IBM Cognos Analytics on Cloud- Trail Product.

2) CSV File and Relationships

After that I have uploaded CSV files from the zip file name Brazilian E- Commerce Public Dataset by Olist1.

There are 9 CSV files.

Name	Type	Compressed size	Password p...	Size	Ratio	Date modified
olist_customers_dataset	Microsoft Excel Comma S...	4,702 KB	No	8,823 KB	47%	2021-10-01 7:08 PM
olist_geolocation_dataset	Microsoft Excel Comma S...	15,285 KB	No	59,838 KB	75%	2021-10-01 7:08 PM
olist_order_items_dataset	Microsoft Excel Comma S...	6,519 KB	No	15,077 KB	57%	2021-10-01 7:08 PM
olist_order_payments_dataset	Microsoft Excel Comma S...	2,549 KB	No	5,642 KB	55%	2021-10-01 7:08 PM
olist_order_reviews_dataset	Microsoft Excel Comma S...	6,576 KB	No	14,113 KB	54%	2021-10-01 7:08 PM
olist_orders_dataset	Microsoft Excel Comma S...	6,915 KB	No	17,242 KB	60%	2021-10-01 7:08 PM
olist_products_dataset	Microsoft Excel Comma S...	1,042 KB	No	2,324 KB	56%	2021-10-01 7:08 PM
olist_sellers_dataset	Microsoft Excel Comma S...	83 KB	No	171 KB	52%	2021-10-01 7:08 PM
product_category_name_translation	Microsoft Excel Comma S...	2 KB	No	3 KB	59%	2021-10-01 7:08 PM

Figure 2: Dataset Files

Figure 3: Build the Relationships

I have made the Lab07 folder in that I have upload all the CSV files and used the following CSV files for the relationships:

1. olist_products_dataset.csv
2. olist_order_items_dataset.csv
3. olist_orders_dataset.csv
4. olist_sellers_dataset.csv
5. olist_order_payments_dataset.csv

Relationships are set up between:

- olist_order_items_dataset.csv and olist_orders_dataset.csv
- olist_order_items_dataset.csv and olist_products_dataset.csv
- olist_order_items_dataset.csv and olist_order_payments_dataset.csv
- olist_order_items_dataset.csv and olist_sellers_dataset.csv

3) Visualization and fields generated with Explanation

Figure 4: Line and Column Graph

Explanation

Type of the Visualization: I have chosen Line and Column Graph.

Data source: The data source I have taken from the olist_orders_dataset.csv and olist_order_payments_dataset.csv.

Fields Used:

X-axis: shipping_limit_date

Column length: price

Column color(Legend): payment_type

Line Graph Data: price (Average)

The X-axis represents **shipping_limit_date**, showing timeline of orders and the Column graphs displays the price of order over time. Also, the Line graph shows the average price trend. Moreover, color legend shows different payment types such as **boleto**, **credit_card**, **debit_card**, **voucher**.

Overall, the dominant payment methods used by customers and trends in product pricing over time. Furthermore, periods with higher purchase activity.
